THREATENED AND
ENDANGERED SPECIES
INFORMATION: This State timber sale contract requires that Purchaser comply with all laws, including the Endangered Species Act (ESA). The Department of Forestry (ODF) has surveyed the sale area shown in Exhibit "A" for northern spotted owls and marbled murrelets. Results of the surveys are on file with ODF, and are available for inspection upon request. Northern spotted owls and marbled murrelets were not detected in survey areas within or adjacent to this sale. However, ODF is engaged in an active threatened or endangered species survey process and does not guarantee that a threatened or endangered species will not be found as a result of those surveys or the surveys of others that might impact this sale. ODF may take steps, including contract alteration or termination as provided in Section 32 of the contract, if ODF believes those steps are necessary to protect the interests of State. Purchaser should take appropriate steps to be certain that no ESA violations occur.

Prospective purchasers are encouraged to contact the ODF wildlife information coordinator (503-945-7374) for further information or questions relative to threatened or endangered species surveys, future planned survey information, or other threatened or endangered species information.

SPECIAL REMARKS: **SEASONAL RESTRICTIONS APPLY - SEE SECTION 39.**
Acres were determined using a digital planimeter and an orthographic photo.
Sale elevation ranges from 1,400' – 1,700'.
200 trees are to be topped as part of this contract.
8 hours of shovel time to block skid roads.

SALE OBJECTIVES: To open up a dense overstory canopy layer thereby releasing a suppressed understory layer of shade tolerant conifer tree species. In addition, this thinning of densely stocked overstory will increase individual tree diameter growth. These factors coupled with the creation of snags and down woody debris will hasten the stands development towards Older Forest Structure.
A second objective is to provide revenue to the local taxing district.

<p>The information shown on the Exhibit "A" map(s) are approximate locations. Exact locations of features represented by map symbols shall be determined on site and shall depend upon the conditions that exist on site. Activities shall be conducted based upon features determined on site rather than features shown on maps.</p>
