INFORMATION:

This State timber sale contract requires that Purchaser comply with all laws, including the Endangered Species Act (ESA). Because of the lack of suitable habitat, the Department of Forestry (ODF) has not surveyed the sale area shown in Exhibit "A" for northern spotted owls or marbled murrelets. However, ODF is engaged in an active threatened or endangered species survey process and does not guarantee that a threatened or endangered species will not be found as a result of those surveys or the surveys of others that might impact this sale. ODF may take steps, including contract alteration or termination as provided in Section 32 of the contract, if ODF believes those steps are necessary to protect the interests of State. Purchaser should take appropriate steps to be certain that no ESA violations occur.

Prospective purchasers are encouraged to contact the ODF wildlife information coordinator (503-945-7374) for further information or questions relative to threatened or endangered species surveys, future planned survey information, or other threatened or endangered species information.

SPECIAL REMARKS:

SEASONAL RESTRICTIONS APPLY - SEE SECTION 39.

Each tree on the timber sale area contains an aluminum nail and tag. The nails are partially driven into the tree bole at breast height. It will be the Purchaser's decision on whether to remove the nails from the "take" trees or not. However, in no case shall the nails be "bucked" out of the logs.

Acres were determined by closed traverse.

Slash piling is required on 3 acres of phellinus patchcuts.

SALE OBJECTIVES:

To thin an overstocked Douglas-fir progeny tree plantation and treat Phellinus root rot by patch cutting which will produce income and improve forest health while retaining selected trees for the progeny study.

The information shown on the Exhibit "A" map(s) are approximate locations. Exact locations of features represented by map symbols shall be determined on site and shall depend upon the conditions that exist on site. Activities shall be conducted based upon features determined on site rather than features shown on maps.
