ENDANGERED SPECIES ACT COMPLIANCE STATEMENT: The Oregon Department of Forestry (ODF) is engaged in an active threatened and endangered (T&E) species survey program. Surveys, determinations, and management measures are developed and implemented in good faith compliance with federal and state Endangered Species Act (ESA) requirements. Restrictions on operations due to T&E species considerations are included in the prospectus. Purchasers are required to comply with all federal and state laws, including the Endangered Species Act. Purchaser should take steps to be certain that no ESA violations occur. Prospective purchasers of timber sales are reminded that ODF surveying efforts may take place any time during the term of a timber sale contract. In some cases, ODF may require that initiation of operations be delayed to allow for completion of spot check surveys, as recommended by the USFWS survey protocol and required by ODF policy. As part of the survey program, ODF surveys its lands on a continuing basis for land management, species protection, research, and other reasons. During the contract term, T&E survey work and/or the discovery of a threatened or endangered species within or in the vicinity of a timber sale may affect operations contemplated under the contract. In the event a threatened or endangered species is found within or near this sale, ODF may take steps necessary to protect the interests of the State, including contract alteration, suspension, or termination.

Prospective purchasers are encouraged to contact the Coos District at (541) 267-4136 for further information or questions relative to threatened or endangered species surveys, future planned survey information, or other threatened or endangered species information.

SPECIAL REMARKS: **NO PERSONAL OR COMPANY CHECKS ACCEPTED FOR THE BID DEPOSIT.**

SEASONAL RESTRICTIONS APPLY - SEE SECTION 2455.

- Acreage was determined electronic digitizing using 2009 LIDAR imagery and ArcMap 10.1 GIS software program.
- Top/Girdle 16 trees for Snag Creation (Section 2335).
- All timber must be felled by April 1, 2014.
- Spotted Owl density surveys of the Elliott State Forest will be conducted during the life of the contract (Section 1520).
- Haul of rock or logs on mile 0.0 to 5.0 of the 1000 Road (Marlow Creek) is not allowed from October 15 through May 15 (Section 2130).
- Pulp removal is not allowed.

Biological Survey Report

Project: Salander Between
Date: September 4, 2013
To: Ryan Greco
CC: Norma Kline, Jim Young, District Sale File
From: Matt Gostin

Habitat Suitability

This sale contains potentially suitable habitat for northern spotted owls and marbled murrelets.

Survey Results

This sale was in an area covered by northern spotted owl density surveys in 2012 and 2013. The density surveys were conducted using a modified survey approach incorporating aspects of both the density survey protocol (Forsman 1995) and the USFWS-endorsed survey protocol for spotted owls (USFWS 2012)^{1,2}. A northern spotted owl was observed within 1.5 miles of the sale on one occasion during these surveys. This observation was attributed to known activity center within 1.5 miles of the timber sale. In addition to the spotted observation, an unknown *STRIX* species owl was observed within 1.5 miles of the sale on one occasion.

² USDI Fish and Wildlife Service. 2012. Protocol for surveying proposed management activities that may impact northern spotted owls. 42pp..

Surveys for marbled murrelets were conducted in 2010 and 2011, using a protocol developed by the Pacific Seabird Group³. Marbled murrelets were detected as present at site 1 during two surveys in 2011. Marbled murrelets were detected as present at site 2 during one survey in 2010 and two surveys in 2011. Marbled murrelets were not detected in site 3. Marbled murrelets were detected as present at site 4 during three surveys in 2011. However, behaviors indicating occupancy were not observed at any site.

Known T&E Resources

The sale is within 1.5 miles of a northern spotted owl activity center. A Biological Assessment of the sale's impact on the activity center has been conducted. It concludes the Salander Between sale, as currently proposed, is expected to have a low risk of negatively affecting the occupancy and productivity of the spotted owl site.

There are no Marbled Murrelet Management Areas affecting this sale.

Operational Considerations

Chainsaw use for tailholds shall not be allowed from April 1, through September 15, annually within the South Umpcoos MMMA or unsurveyed mature habitat. No daily timing restrictions shall be allowed.

Northern spotted owl survey results are valid until March 15, 2016. Marbled murrelet survey results are valid until April 1, 2017.

All timber should be felled by March 15, 2016.

Future Survey Plans

ODF has no plans for further survey of this sale. However, ODF will conduct operational, density, and/or activity center monitoring surveys for northern spotted owls within 3 miles of this sale during the duration of the contract.
