ENDANGERED SPECIES ACT COMPLIANCE STATEMENT: The Oregon Department of Forestry (ODF) is engaged in an active threatened and endangered (T&E) species survey program. Surveys, determinations, and management measures are developed and implemented in good faith compliance with federal and state

Endangered Species Act () requirements. Restrictions on operations due to T&E species considerations are included in the prospectus. Purchasers are required to comply with all federal and state laws, including the Endangered Species Act. Purchaser should take steps to be certain that no violations occur. Prospective purchasers of timber sales are reminded that ODF surveying efforts may take place any time during the term of a timber sale contract. In some cases, ODF may require that initiation of operations be delayed to allow for completion of spot check surveys, as recommended by the USFWS survey protocol and required by ODF policy. As part of the survey program, ODF surveys its lands on a continuing basis for land management, species protection, research, and other reasons. During the contract term, T&E survey work and/or the discovery of a threatened or endangered species within or in the vicinity of a timber sale may affect operations contemplated under the contract. Also, legal challenges and other litigation regarding ODF threatened and endangered species related processes may occur and may affect operations contemplated under the contract. In the event a threatened or endangered species is found within or near this sale, or efforts are required to respond to legal issues, ODF may take steps necessary to protect the interests of the State, including contract alteration, suspension, or termination.

Prospective purchasers are encouraged to contact the Western Lane ODF District at (541) 935-2283 for further information or questions relative to threatened or endangered species surveys, future planned survey information, or other threatened or endangered species information.

SPECIAL REMARKS:

NO PERSONAL OR COMPANY CHECKS ACCEPTED FOR THE BID DEPOSIT. SEASONAL RESTRICTIONS APPLY - SECTION 2455.

Pulp removal is optional.

All felling must be completed by March 15, 2021 (Sections 2310 and 2455).

Log hauling on unsurfaced roads shall not be allowed from October 31 through April 30.

Log hauling from October 31 to April 30 is subject to a "Loads/Day limitation during wet weather."

Ground-based operations shall not be allowed during periods of high soil moisture as determined by STATE.

Prior to the beginning of cable yarding Operations, PURCHASER shall mark the locations on the ground of cable corridors running through reforested areas, subject to STATE approval.

The information shown on the Exhibit A map(s) are approximate locations. Exact locations of features represented by map symbols shall be determined on site and shall depend upon the conditions that exist on site. Activities shall be conducted based upon features determined on site rather than features shown on maps.

Habitat Suitability

This sale contains potentially suitable habitat for northern spotted owls and marbled murrelets.

Survey Results

This sale was surveyed for northern spotted owls in 2017 and 2018, using a protocol endorsed by the U.S. Fish and Wildlife Service^{1,2}. Northern spotted owls were not observed during these surveys.

Surveys for marbled murrelets were conducted for this sale in 2015 and 2016, using a protocol developed by the Pacific Seabird Group³. Murrelets were detected as present during one survey in site 3 in 2015. However, detections indicative of occupancy were not observed in either year of surveys.

Known T&E Resources

This sale is within 1.5 miles of a northern spotted owl activity center. Since this sale falls within a non-baseline activity center as identified in the Safe Harbor Agreement (SHA) with the U.S. Fish & Wildlife Service (USFWS), a Biological Assessment of the sale's potential impact is not required by ODF policy.

Operational Considerations

Due to the presence of barred owls, felling restrictions for spotted owl spot check surveys are not required for this sale.

Current northern spotted owl survey results are valid until March 15, 2021.

Marbled murrelet survey results are valid until April 1, 2022.

All timber should be felled by March 15, 2021.

Future Survey Plans

ODF has entered into an agreement with the USFWS known as a SHA. This agreement allows the U.S. Geological Survey (USGS) to conduct a study on ODF managed lands which includes population reduction measures on barred owls to assess the impacts on northern spotted owls. This Contract contains sale areas within the USGS study boundary. Under this agreement, if nesting northern spotted owls are found in or within close proximity of the timber sale, the nest and surrounding area would be protected until fledglings leave the nest utilizing seasonal restrictions and other measures. In addition, ODF may take other actions including retaining and protecting trees in the immediate area of a nest tree.

Spotted owl spot check surveys for this timber sale will be required in 2019 and 2020. In addition, ODF has an active northern spotted owl survey program and spot checks, surveys for other planned operations, and activity center monitoring will be conducted within 3 miles of this sale during the life of the contract.
