ENDANGERED SPECIES ACT COMPLIANCE STATEMENT: The Oregon Department of Forestry (ODF) is engaged in an active threatened and endangered (T&E) species survey program. Surveys, determinations, and management measures are developed and implemented in good faith compliance with federal and state

Endangered Species Act (ESA) requirements. Restrictions on operations due to T&E species considerations are included in the prospectus. Purchasers are required to comply with all federal and state laws, including the Endangered Species Act. Purchaser should take steps to be certain that no violations occur. Prospective purchasers of timber sales are reminded that ODF surveying efforts may take place any time during the term of a timber sale contract. In some cases, ODF may require that initiation of operations be delayed to allow for completion of spot check surveys, as recommended by the USFWS survey protocol and required by ODF policy. As part of the survey program, ODF surveys its lands on a continuing basis for land management, species protection, research, and other reasons. During the contract term, T&E survey work and/or the discovery of a threatened or endangered species within or in the vicinity of a timber sale may affect operations contemplated under the contract. Also, legal challenges and other litigation regarding ODF threatened and endangered species related processes may occur and may affect operations contemplated under the contract. In the event a threatened or endangered species is found within or near this sale, or efforts are required to respond to legal issues, ODF may take steps necessary to protect the interests of the State, including contract alteration, suspension, or termination.

Prospective purchasers are encouraged to contact the Astoria ODF District at (503) 325-5451 for further information or questions relative to threatened or endangered species surveys, future planned survey information, or other threatened or endangered species information.

ODF will modify timber sale contracts to allow purchasers who harvest after HCP permit issuance (expected in 2022) to harvest either (1) under requirements pre HCP to avoid take of listed species or (2) under the new requirements of the HCP, as applicable to each timber sale. If a purchaser chooses to harvest consistent with the requirements of the HCP, it will be the responsibility of the purchaser to comply with the HCP and permits, with assistance from and approval by ODF.

SPECIAL REMARKS:

NO PERSONAL OR COMPANY CHECKS ACCEPTED FOR THE BID DEPOSIT. SEASONAL RESTRICTIONS APPLY - SECTION 2455.

There is a midpoint payment for this sale of 50% due on June 30, 2024.

Approximately 2 acres of Unit 3 have an Early Felling Deadline of April 1, 2025. (Section 2310). See Exhibit A for specific locations.

All pulp yarded to the landing shall be hauled. (Section 2045)

Unit 5 contains 8 patch cuts and 24 leave areas. These areas are shown as Group Selection A and Group Selection B, respectively, on Exhibit A. See Exhibit A for specific locations.

The information shown on the Exhibit A map(s) are approximate locations. Exact locations of features represented by map symbols shall be determined on site and shall depend upon the conditions that exist on site. Activities shall be conducted based upon features determined on site rather than features shown on maps.

See inside front cover of Timber Sale Schedule handbook for disclaimer regarding all government regulatory actions.

Habitat Suitability

This sale has potentially suitable habitat for northern spotted owls and marbled murrelets within or adjacent to all sale units.

Survey Results

All sale units were covered by ongoing spotted owl density surveys in 2020 and 2021^{1, 2, 3}. Northern spotted owls have not been observed during these surveys. An unknown *Strix* owl was observed once in 2020 and unknown *Strix* owls were observed three times in 2021. Density surveys will be ongoing during the life of the sale contract.

Sale units were surveyed for marbled murrelets in multiple years from 2018–2021. These surveys were conducted using a protocol developed by the Pacific Seabird Group⁴. Marbled murrelets were not detected during any year of surveys.

Known T&E Resources

There are no northern spotted owl activity centers or Marbled Murrelet Management Areas (MMMA) affecting this sale.

Operational Considerations

Due to the presence of barred owls, felling restrictions for spotted owl spot check surveys are not required for this sale at this time.

Northern spotted owl survey results will not expire unless density surveys are discontinued. If density surveys are discontinued at any point during the contract, survey coverage will be valid until March 15, three years following the last full season of surveys.

Marbled murrelet surveys are valid until April 1, 2025 for portions of Unit 3; April 1, 2026 for the remaining portion of Unit 3, all of Unit 4 and portions of Unit 5; April 1, 2027 for the remaining portion of Unit 5 and all of Unit 1.

All timber within the Early Felling Areas, as depicted in the Exhibit A, should be felled by April 1, 2025. Remaining portions of Units 3, all of Unit 4 and portions of Unit 5 should be felled by April 1, 2026. The remaining portions of Unit 5 and all of Unit 1 should be felled by April 1, 2027.

Future Survey Plans

This sale will be covered by northern spotted owl density surveys during the life of the contract. These density surveys provide incidental survey coverage in lieu of spot checks. If density surveys are not conducted, then spot checks will be required. In addition, ODF has an active survey program and surveys for other planned operations and northern spotted owl density surveys will be conducted within 3 miles of this sale during the life of the contract. Marbled murrelet surveys are scheduled to be conducted within ¼ mile of this sale during the life of the contract.
