ENDANGERED SPECIES ACT COMPLIANCE STATEMENT: The Oregon Department of Forestry (ODF) is engaged in an active threatened and endangered (T&E) species survey program. Surveys, determinations, and management measures are developed and implemented in good faith compliance with federal and state

Endangered Species Act (ESA) requirements. Restrictions on operations due to T&E species considerations are included in the prospectus. Purchasers are required to comply with all federal and state laws, including the Endangered Species Act. Purchaser should take steps to be certain that no violations occur. Prospective purchasers of timber sales are reminded that ODF surveying efforts may take place any time during the term of a timber sale contract. In some cases, ODF may require that initiation of operations be delayed to allow for completion of spot check surveys, as recommended by the USFWS survey protocol and required by ODF policy. As part of the survey program, ODF surveys its lands on a continuing basis for land management, species protection, research, and other reasons. During the contract term, T&E survey work and/or the discovery of a threatened or endangered species within or in the vicinity of a timber sale may affect operations contemplated under the contract. Also, legal challenges and other litigation regarding ODF threatened and endangered species related processes may occur and may affect operations contemplated under the contract. In the event a threatened or endangered species is found within or near this sale, or efforts are required to respond to legal issues, ODF may take steps necessary to protect the interests of the State, including contract alteration, suspension, or termination.

Prospective purchasers are encouraged to contact the Astoria ODF District at (503) 325-5451 for further information or questions relative to threatened or endangered species surveys, future planned survey information, or other threatened or endangered species information.

ODF will modify timber sale contracts to allow purchasers who harvest after HCP permit issuance (expected in 2022) to harvest either (1) under requirements pre HCP to avoid take of listed species or (2) under the new requirements of the HCP, as applicable to each timber sale. If a purchaser chooses to harvest consistent with the requirements of the HCP, it will be the responsibility of the purchaser to comply with the HCP and permits, with assistance from and approval by ODF.

SPECIAL REMARKS:

NO PERSONAL OR COMPANY CHECKS ACCEPTED FOR THE BID DEPOSIT. SEASONAL RESTRICTIONS APPLY - SECTION 2455.

There is a midpoint payment for this sale of 50% due October 31, 2023.

The key for the gate on Tidewater Road is available upon request.

It may be necessary to endhaul slash on the eastern portion of Unit 2 to a more suitable location in the unit.

Blasting and rock crushing at the West Tidewater Quarry shall not be allowed from April 1 through August 5. From August 6 through September 15, blasting can only occur from 2 hours after sunrise until 2 hours before sunset. (Section 2455)

All Pulp that is yarded to the landing shall be hauled. (Section 2045)

The information shown on the Exhibit A map(s) are approximate locations. Exact locations of features represented by map symbols shall be determined on site and shall depend upon the conditions that exist on site. Activities shall be conducted based upon features determined on site rather than features shown on maps.

Habitat Suitability

This sale contains potentially suitable habitat for northern spotted owls and marbled murrelets in all units.

Survey Results

All sale units have been covered by ongoing spotted owl density surveys beginning in 2018^{1, 2, 3}. Northern spotted owls have not been observed during these surveys to date. Density surveys will be ongoing during the life of the sale contract.

This sale was surveyed for marbled murrelets in 2019 and 2020. These surveys were conducted using a protocol developed by the Pacific Seabird Group⁴. Marbled murrelets were not detected during any year of surveys.

Known T&E Resources

There are no northern spotted owl activity centers or Marbled Murrelet Management Areas (MMMA) affecting this sale.

Operational Considerations

Due to the presence of barred owls, felling restrictions for spotted owl spot check surveys are not required for this sale at this time.

Northern spotted owl survey results will not expire unless density surveys are discontinued. If density surveys are discontinued at any point during the contract, survey coverage will be valid until March 15, three years following the last full season of surveys.

Blasting and rock crushing will occur at the West Tidewater pit (located in the NW 1/4, Section 18, T6N, R7W, W.M.) as part of this sale contract. Seasonal and daily timing restrictions will apply due to proximity to the West Tidewater MMMA. Blasting and rock crushing are not allowed from April 1st through August 5th. From August 6th through September 15th, blasting can only occur from 2 hours after sunrise until 2 hours before sunset. These restrictions apply for every year of the life of the sale.

Marbled murrelet surveys are valid until April 1, 2026.

All timber should be felled by April 1, 2026.

Future Survey Plans

This sale will be covered by northern spotted owl density surveys during the life of the contract. These density surveys provide incidental survey coverage in lieu of spot checks. If density surveys are not conducted, then spot checks will be required. In addition, ODF has an active survey program and surveys for other planned operations and northern spotted owl density surveys will be conducted within 3 miles of this sale during the life of the contract. In addition, marbled murrelet surveys are scheduled to be conducted within ¼ mile of this sale during the life of the contract.
