Habitat Suitability

There is potentially suitable habitat for northern spotted owls and marbled murrelets within and adjacent to this sale.

Survey Results

This sale was covered by ongoing spotted owl density surveys in 2020 and 2021^{1,2,3}. Northern spotted owls have not been observed within 1.5 miles during these surveys. An unknown *Strix* owl was observed within 1.5 miles in 2021 on one occasion. Density surveys will be ongoing during the life of the sale contract.

This sale was surveyed for marbled murrelets in 2020 and 2021. These surveys were conducted using a protocol developed by the Pacific Seabird Group⁴. Marbled murrelets were not detected during any of these surveys.

Known T&E Resources

There are no northern spotted owl activity centers or Marbled Murrelet Management Areas (MMMA) affecting this sale.

Operational Considerations

Due to the presence of barred owls, felling restrictions for spotted owl spot check surveys are not required for this sale at this time.

Northern spotted owl survey results will not expire unless density surveys are discontinued. If density surveys are discontinued at any point during the contract, survey coverage will be valid until March 15, three years following the last full season of surveys.

Marbled murrelet surveys are valid until April 1, 2027.

All timber should be felled by April 1, 2027.

Future Survey Plans

This sale will be covered by northern spotted owl density surveys during the life of the contract. These density surveys provide incidental survey coverage in lieu of spot checks. If density surveys are not conducted, then spot checks will be required. In addition, ODF has an active survey program and surveys for other planned operations and northern spotted owl density surveys will be conducted within 3 miles of this sale during the life of the contract.
