Pine Grove GNA  
MAMU and NSO seasonal restriction summary

**MAMU restriction:** No activity from April 1 through August 5, then August 6 through September 15 no activities until 2 hours after sunrise and must end 2 hours before sunset. Identified as “MAMU Seasonal Restriction” on maps

**NSO restriction:** No activity from March 1 through June 30. Identified as “NSO Seasonal Restriction” on maps

**Area 1:** No restrictions

**Area 2:** Unmarked MAMU seasonal restrictions at the bottom of the unit. No haul restrictions.

**Area 3:** Minimal MAMU seasonal restrictions on north and south tips. No haul restrictions. Temporary stream crossing is allowed and addressed in contract to log with ground based equipment.

**Area 4:** MAMU seasonal restrictions on western boundary including 4A to 4B road improvement. Haul restrictions on 4A to 4B.

**Area 6:** MAMU harvest restrictions on eastern side. Haul is MAMU restricted between sale area and the 3318 road.

**Area 8:** MAMU seasonal restriction in NW corner. No haul restriction.

**Area 9:** MAMU seasonal restriction in NE corner. Haul restriction on 080 road between 9H and 9I and spur 9I to 9J.

**Area 10:** MAMU seasonal restriction on SW boundary including two landings and road improvement work. All haul is MAMU restricted.

**Area 11:** No harvest restriction. Haul is MAMU restricted on 080 (west side) and NSO restricted on east side (110 road)

**Area 12:** MAMU and NSO seasonal restrictions on landing 12B. Haul and road improvement is both MAMU and NSO seasonally restricted.

**Area 13:** All roads and landings are MAMU seasonally restricted. Haul is both NSO and MAMU restricted.

**Area 14:** Landing 14B is MAMU restricted, western side has both NSO and MAMU seasonal restrictions. Haul is MAMU and NSO seasonally restricted.

**Area 15:** West side contains MAMU seasonal restrictions. Haul is both NSO and MAMU restricted.

**Area 101:** Significant MAMU seasonal restrictions. Haul is MAMU restricted. Contains individually marked wildlife leave trees.

**Area 102:** MAMU seasonal restrictions on northern boundary. Haul is MAMU restricted on F to 101A spur but not elsewhere. Contains individually marked wildlife leave trees.

Operations Allowed

Activity Restricted 2 hours before sunset through 2 hours after sunrise

Operations Prohibited - T & E

Operations Prohibited for weather conditions: unless otherwise approved in writing by STATE

Operating Matrix represents the seasonal restrictions contained within the body of the timber sale contract. See Section 2455 for further information on seasonal restrictions.

## TIMBER SALE SUMMARY

1. **Type of Sale:** Pine Grove GNA is a Recovery sale, sealed bid auction of 530 net acres of thinning.
2. **Revenue Distribution:** USFS regional agreement 24-GN-11061000-182  
Project: GF7424-01 PCA: 02609
3. **Sale Acreage:** Total mapped acres are 530, though 500.1 net acres were used for the cruise expansion after removal of existing roads and landings. The acreage was determined with ArcGIS Pro. Optional patch cuts totaling 36 acres are included as a separate row in the table below.
4. **Volume:** The table below describes the volume by grade over the sale area. The primary species is Douglas-fir.

| SALE VOLUME BY GRADE BF |                  |                  |                  |                  |
|-------------------------|------------------|------------------|------------------|------------------|
| Species                 | 2 Saw            | 3 Saw            | 4 Saw            | Total            |
| Plantation DF           | 390,259          | 1,967,002        | 1,129,697        | 3,486,958        |
| Mature DF               | 628,436          | 459,694          | 166,435          | 1,254,565        |
| Patch Cuts              | 33,837           | 170,549          | 97,951           | 302,337          |
| <b>Sale Volume</b>      | <b>1,052,532</b> | <b>2,597,245</b> | <b>1,394,083</b> | <b>5,043,860</b> |

\*Adjusted 3% for hidden cull and breakage

| SALE VOLUME BY GRADE TONS |              |               |               |               |
|---------------------------|--------------|---------------|---------------|---------------|
| Species                   | 2 Saw        | 3 Saw         | 4 Saw         | Total         |
| Plantation DF             | 2,840        | 14,293        | 8,210         | 25,343        |
| Mature DF                 | 4,247        | 3,105         | 1,125         | 8,477         |
| Patch Cuts                | 246          | 1,239         | 712           | 2,197         |
| <b>Sale Volume</b>        | <b>7,333</b> | <b>18,637</b> | <b>10,047</b> | <b>36,017</b> |

\*Adjusted 3% for hidden cull and breakage

5. **Timber Description:** There are 15 units in the timber sale which have two stand timber types. Acreage of this stand type is 442, with 370 acres of well stocked trees after 72 acres of low stocked areas were removed. Areas 1-15 (areas 5 and 7 do not exist) were regeneration harvests between 1965 and 1973; trees now range from 50 to 60 years old. These stands are variable in density, tree size, and understory component. Areas identified as low stocked which may not have sufficient basal area for thinning have been identified on sale maps and were included in the cruise. Cut or no-cut trees have not been marked. The sale is designed to use a basal area prescription unique for each sale area identified in Section 2320 of the timber sale contract. ODF's sale administrator will assist the purchaser in achieving the desired treatment through sample plots.

Areas 101 and 102 are an older age class, consisting of pine, fir, and cedar. Acreage of this stand type is 89, with 79 acres of well stocked trees after 10 acres of low stocked areas were removed. This prescription will cut douglas-fir, removing competition and releasing the pine. These stands are approximately 100 years old.

|                      |                  | DBH<br>(in) | Bole length<br>to 5" top (ft) | Basal Area<br>(SQ ft. /ac) | Trees<br>per acre | MBF/AC |
|----------------------|------------------|-------------|-------------------------------|----------------------------|-------------------|--------|
| Areas 1-<br>15       | Current stand    | 14.1        | 63                            | 166                        | 154               | 20     |
|                      | Cut prescription | 12.9        | 60                            | 77                         | 85                | 8.7    |
|                      |                  |             |                               |                            |                   |        |
| Areas<br>101,<br>102 | Current stand    | 22.1        | 102                           | 234                        | 88                | 47.4   |
|                      | Cut prescription | 17.4        | 94                            | 94                         | 57                | 15.2   |

Area 101: Trees to be cut are individually marked with blue paint. Retention trees may be marked in orange or have a W painted on them.

Area 102: There is a road bisecting this area identified on maps as F to 102C. No-cut trees above this road are marked in orange paint. Cut trees are not painted. Below this road, cut trees are marked in blue paint. No cut trees are not marked.

6. **Topography and Logging Method:** The sale will need a combination of ground-based (46%) and cable logging (54%). The sales are bisected by streams as shown on maps as is typical of the coast range. Stream buffers and sale boundaries are marked in the field.
7. **Access:** From Gold Beach, travel east along the south bank Rogue River on Jerry's Flat Road / USFS Road 33 for 18.1 miles to the 3318 road. Proceed up the 3318 for 5.8 miles to the "five corners" intersection adjacent to Area 102. Sale areas are accessed from the 3318, 080, and 110 roads and spurs.
8. **Projects:** See project Summary. Projects include road improvement, road construction, culvert removal, and road and landing subsoiling. Total costs for these projects is \$101,453. There are other costs as shown below. Completed and approved projects will result in the timber account being credited the indicated amount per project.
9. **Road Maintenance:** The appraisal includes \$6.48 per MBF for road maintenance (grading, pulling ditches, etc.) on 3318, 080, and 110 roads and spurs. Other roads used under this contract that are not subsoiled will require maintenance. Purchaser is not required to maintain the Agness Road 33.
10. **Other Costs:** Additional costs including profit and risk were appraised for equipment weed washing, slash piling, plastic sheeting for slash piles, rig lift trees, artificial guy anchors, and fuels treatment of 159 acres, totaling \$66,505.
11. **Slash Disposal:** Purchaser will pile slash on landings with an excavator or log loader, sorting out firewood into separate piles only on road systems that will remain open and accessible post-harvest. The appraisal includes costs for machine piling on the landings including plastic. Purchaser shall not burn harvest slash.

## OREGON DEPARTMENT of FORESTRY CRUISE REPORT

1. **Acreage Calculation:** For the Pine Grove Timber Sale, there are 530 net cruise acres in the sale area determined by ArcGIS Pro software. Net acres do not include the riparian management areas. Roads were removed from the cruise expansion acres. Total cruise expansion acres is 500.1.
2. **Cruise Method:** A measure/count variable plot cruise was conducted on the sale area by ODF during the Fall of 2024.
3. **RIGHT of WAY VOLUMES:** There is currently no right of way volume added into the cruise. Temp roads may have an incidental amount of volume within the road prism.
4. **Sampling Intensity:**

105 Total Plots (62 Measured, 58 Count Plots)

|           |              |
|-----------|--------------|
| CV (TPA)  | <u>79.9%</u> |
| SE (BDFT) | <u>9.4%</u>  |

As per ODF standards, total harvest volume ("take" trees) is estimated to be 5,044 MBF  $\pm$  474 MBF at the 68% confidence level and a sampling error of 9.4%\*. Sixty-eight times out of 100 the volume estimate will be within range of error specified.

5. **Computation Procedures:** Volume was computed using the SuperACE cruise program. Volumes reported are based on the Scribner Log Rule (Westside scale).
6. **Form Factors:** Form factors (a ratio of diameter at 4 and 16 feet) were sampled across the diameter distribution in all strata. Those form factors which were not measured were estimated by SuperACE.
7. **Height Standards:** Most conifer trees were measured for total height with a laser rangefinder.
8. **Diameter standards:** Diameters were measured outside bark at breast height to the nearest inch.
9. **Grading System:** Trees were graded primarily as 34 foot segment lengths and according to the Official Log Scaling and Grading Rules published by the Northwest Log Rules Advisory Group.
10. **Merchantable top:** Conifer were graded to a merchantable top specified by the official log scaling rules. For all species, 2 saw segments were graded to a 12" top inside bark, 3 saw to a 6" top, and 4 saw to a 5" top (inside bark).
11. **Deductions for Cull, Defect and Breakage:** All visible field cull was removed in the cruise computation. Additional volume was deducted for the anticipated amount of hidden cull and breakage during logging. The estimated volume reduction used for this anticipated loss to volume is 3%. The small tree strata is not expected to have much volume reduction from breakage or hidden cull. The larger tree strata may have greater breakage due to taller trees.
12. **Cruisers:** Cruising was performed by ODF Foresters Jim Martz and Chris Rudd.

\*ODF does not guarantee the volume of this or any other cruise. Prospective purchasers are advised to do their own cruise and sale volume calculations. Additional SuperAce Reports available upon request.

## VOLUME SUMMARY

| CRUISE VOLUME PER ACRE BF |       |       |       |                 | ADJUSTED VOLUME BF/ACRE* |       |              |
|---------------------------|-------|-------|-------|-----------------|--------------------------|-------|--------------|
| Species (Take)            | 2 Saw | 3 Saw | 4 Saw | Cruise Vol/Acre | 2 Saw                    | 3 Saw | NET ACRES*** |
| Small Douglas-fir         | 969   | 4,884 | 2,805 | 8,658           | 940                      | 4,737 | 415.2        |

ODF does not guarantee the volume of this or any other cruise. Prospective purchasers are advised to complete their own cruise. These volumes reflect merchantable saw logs. A small amount of pulp logs could be harvested from the sale area. Additional SuperAce Reports are available upon request.

## OREGON DEPARTMENT of FORESTRY CRUISE REPORT

1. **Acreage Calculation:** For the Pine Grove Timber Sale, there are 530 net cruise acres in the sale area determined by ArcGIS Pro software. Net acres do not include the riparian management areas. Roads were removed from the cruise expansion acres. Total cruise expansion acres is 500.1.
2. **Cruise Method:** A measure/count variable plot cruise was conducted on the sale area by ODF during the Fall of 2024.
3. **RIGHT of WAY VOLUMES:** There is currently no right of way volume added into the cruise. Temp roads may have an incidental amount of volume within the road prism.
4. **Sampling Intensity:**

105 Total Plots (62 Measured, 58 Count Plots)

|           |              |
|-----------|--------------|
| CV (TPA)  | <u>79.9%</u> |
| SE (BDFT) | <u>9.4%</u>  |

As per ODF standards, total harvest volume ("take" trees) is estimated to be 5,044 MBF  $\pm$  474 MBF at the 68% confidence level and a sampling error of 9.4%\*. Sixty-eight times out of 100 the volume estimate will be within range of error specified.

5. **Computation Procedures:** Volume was computed using the SuperACE cruise program. Volumes reported are based on the Scribner Log Rule (Westside scale).
6. **Form Factors:** Form factors (a ratio of diameter at 4 and 16 feet) were sampled across the diameter distribution in all strata. Those form factors which were not measured were estimated by SuperACE.
7. **Height Standards:** Most conifer trees were measured for total height with a laser rangefinder.
8. **Diameter standards:** Diameters were measured outside bark at breast height to the nearest inch.
9. **Grading System:** Trees were graded primarily as 34 foot segment lengths and according to the Official Log Scaling and Grading Rules published by the Northwest Log Rules Advisory Group.
10. **Merchantable top:** Conifer were graded to a merchantable top specified by the official log scaling rules. For all species, 2 saw segments were graded to a 12" top inside bark, 3 saw to a 6" top, and 4 saw to a 5" top (inside bark).
11. **Deductions for Cull, Defect and Breakage:** All visible field cull was removed in the cruise computation. Additional volume was deducted for the anticipated amount of hidden cull and breakage during logging. The estimated volume reduction used for this anticipated loss to volume is 3%. The small tree strata is not expected to have much volume reduction from breakage or hidden cull. The larger tree strata may have greater breakage due to taller trees.
12. **Cruisers:** Cruising was performed by ODF Foresters Jim Martz and Chris Rudd.

\*ODF does not guarantee the volume of this or any other cruise. Prospective purchasers are advised to do their own cruise and sale volume calculations. Additional SuperAce Reports available upon request.

## VOLUME SUMMARY

| CRUISE VOLUME PER ACRE BF |       |       |       |                 | ADJUSTED VOLUME BF/ACRE* |       |          |              |
|---------------------------|-------|-------|-------|-----------------|--------------------------|-------|----------|--------------|
| Species (Take)            | 2 Saw | 3 Saw | 4 Saw | Cruise Vol/Acre | 2 Saw                    | 3 Saw | 4 Saw/CR | NET ACRES*** |
| Small Douglas-fir         | 969   | 4,884 | 2,805 | 8,658           | 940                      | 4,737 | 2,721    | 415.2        |
| Medium Douglas-fir        | 7,631 | 5,582 | 2,021 | 15,234          | 7,402                    | 5,415 | 1,960    | 84.9         |
| Patch Cuts****            | 969   | 4,884 | 2,805 | 8,658           | 940                      | 4,737 | 2,721    |              |
| <b>Sale Volume</b>        |       |       |       |                 |                          |       |          | 500.1        |

\*Adjusted 3% for hidden cull and breakage

\*\*\*\* Patch Cuts are optional - See Section 2320. Up to 36 acres included in plantation patch cuts.

| CALCULATED TONNAGE PER ACRE** |       |       |       |                 | ADJUSTED VOLUME TONS/ACRE* |       |          |              |
