ENDANGERED SPECIES ACT COMPLIANCE STATEMENT: The Oregon Department of Forestry (ODF) is engaged in an active threatened and endangered (T&E) species survey program. Surveys, determinations, and management measures are developed and implemented in good faith compliance with federal and state Endangered Species Act (ESA) requirements. Restrictions on operations due to T&E species considerations are included in the prospectus. Purchasers are required to comply with all federal and state laws, including the Endangered Species Act. Purchaser should take steps to be certain that no violations occur. Prospective purchasers of timber sales are reminded that ODF surveying efforts may take place any time during the term of a timber sale contract. In some cases, ODF may require that initiation of operations be delayed to allow for completion of spot check surveys, as recommended by the USFWS survey protocol and required by ODF policy. As part of the survey program, ODF surveys its lands on a continuing basis for land management, species protection, research, and other reasons. During the contract term, T&E survey work and/or the discovery of a threatened or endangered species within or in the vicinity of a timber sale may affect operations contemplated under the contract. Also, legal challenges and other litigation regarding ODF threatened and endangered species related processes may occur and may affect operations contemplated under the contract. In the event a threatened or endangered species is found within or near this sale, or efforts are required to respond to legal issues, ODF may take steps necessary to protect the interests of the State, including contract alteration, suspension, or termination.

Prospective purchasers are encouraged to contact the Forest Grove ODF District at (503) 357-2191 for further information or questions relative to threatened or endangered species surveys, future planned survey information, or other threatened or endangered species information.

ODF will modify timber sale contracts to allow purchasers who harvest after HCP permit issuance (expected in 2022) to harvest either (1) under requirements pre HCP to avoid take of listed species or (2) under the new requirements of the HCP, as applicable to each timber sale. If a purchaser chooses to harvest consistent with the requirements of the HCP, it will be the responsibility of the purchaser to comply with the HCP and permits, with assistance from and approval by ODF.

Habitat Suitability

There is potentially suitable habitat for northern spotted owls within Unit 1 and Unit 2. There is potentially suitable habitat for marbled murrelets within Unit 1. There is potentially suitable habitat for marbled murrelets within and adjacent to Unit 2.

Survey Results

This sale was covered by density surveys in 2020 and 2021^{1,2,3}. These density surveys are ongoing and are planned to be conducted during the life of this contract. Northern spotted owls have not been observed within 1.5 miles of this sale during these surveys. An unknown *Strix* owl was observed on one occasion in 2020.

This sale was surveyed for marbled murrelets in 2020/2021, and 2021/2022, using a protocol developed by the Pacific Seabird Group⁴. Marbled murrelets were not detected during these surveys.

Known T&E Resources

There are no northern spotted owl activity centers or Marbled Murrelet Management Areas affecting this sale.

Operational Considerations

This sale is in a density survey coverage area. Northern spotted owl felling deadlines for survey expirations will not be in effect unless density surveys are discontinued. If density surveys are discontinued at any point during the contract, survey coverage will be valid until March 15, three years following the last full season of surveys.

Marbled murrelet surveys are valid until April 1, 2027.

All timber should be felled by April 1, 2027.

Future Survey Plans

This sale will be covered by northern spotted owl density surveys during the life of the contract. These density surveys provide incidental survey coverage in lieu of spot checks. If density surveys are not conducted, then spot checks will be required. In addition, ODF has an active survey program and surveys for other planned operations and northern spotted owl density surveys will be conducted within 3 miles of this sale during the life of the contract.
