

OREGON DEPARTMENT of FORESTRY CRUISE REPORT

- 1. Acreage Calculation:** For the Kraken Timber Sale, there are 328.2 net cruise acres in the sale area determined by a combination of GPS traverse waypoints and ArcPro software. Net acres do not include the riparian management areas and non-stocked areas which were not cruised.
- 2. Cruise Method:** A variable plot cruise was conducted on the sale area by ODF during the Summer of 2025.
- 3. RIGHT of WAY VOLUMES:** There is currently no right of way volume added into the cruise. Temp roads may have an incidental amount of volume within the road prism.
- 4. Sampling Intensity:**

154 Total Plots (66 Measured, 87 Basal DBH Count Plots, 1 Blank Plot)

CV (TPA) 77.8 (take)
SE (BDFT) 7.1 (take)

As per ODF standards, total harvest volume of conifers and hardwoods ("take" trees) is estimated to be 3,408 MBF ± 242,623 bdf t at the 68% confidence level and a sampling error of 7.1%*. Sixty-eight times out of 100 the volume estimate will be within range of error specified.

- 5. Computation Procedures:** Volume was computed using the SuperACE cruise program. Volumes reported are based on the Scribner Log Rule (Westside scale).
- 6. Form Factors:** Form factors (a ratio of diameter at 4 and 16 feet) were recorded in all measure plots and computed in count plots. Those form factors which were not measured were estimated by SuperACE.
- 7. Height Standards:** Most conifer trees were measured for total height with a laser rangefinder.
- 8. Diameter standards:** Diameters were measured outside bark at breast height to the nearest inch.
- 9. Grading System:** Trees were graded primarily as 34-foot segment lengths and according to the Official Log Scaling and Grading Rules published by the Northwest Log Rules Advisory Group.
Trees Height: Conifer was measured to total height. For all species.
- 10. Deductions for Cull, Defect and Breakage:** All visible field cull were removed in the cruise computation. An additional 5% was deducted from the "Recovery %" on page 2 of the appraisal.
- 11. Cruisers:** Cruising was performed by ODF Foresters Jim Martz and Chris Rudd.

*ODF does not guarantee the volume of this or any other cruise. Prospective purchasers are advised to do their own cruise and sale volume calculations. Additional SuperAce Reports available upon request.

Reviewed by /s/ *Chris Rudd*, Unit Forester: 1/12/2026

Unit 8 Logging Plan: 25% Cable, 75% Ground-based logging. Cable log to the 260 road from middle of unit with small yarder, yoader, or teathered logging. West portion of unit 8 is steep - hand fall. Ground-based skidding as shown on map utilizing old skid trail footprints outside protected areas. Skidding on slopes less than 35%. Unit 9 mostly ground based. Hand fall above 35% slope felling to the skid roads and use existing skid trails. Potential shovel logging off existing skid roads and 260 Rd.
