ENDANGERED SPECIES ACT COMPLIANCE STATEMENT: The Oregon Department of Forestry (ODF) is engaged in an active threatened and endangered (T&E) species survey program. Surveys, determinations, and management measures are developed and implemented in good faith compliance with federal and state Endangered Species Act (ESA) requirements. Restrictions on operations due to T&E species considerations are included in the prospectus. Purchasers are required to comply with all federal and state laws, including the Endangered Species Act. Purchaser should take steps to be certain that no violations occur. Prospective purchasers of timber sales are reminded that ODF surveying efforts may take place any time during the term of a timber sale contract. In some cases, ODF may require that initiation of operations be delayed to allow for completion of spot check surveys, as recommended by the USFWS survey protocol and required by ODF policy. As part of the survey program, ODF surveys its lands on a continuing basis for land management, species protection, research, and other reasons. During the contract term, T&E survey work and/or the discovery of a threatened or endangered species within or in the vicinity of a timber sale may affect operations contemplated under the contract. Also, legal challenges and other litigation regarding ODF threatened and endangered species related processes may occur and may affect operations contemplated under the contract. In the event a threatened or endangered species is found within or near this sale, or efforts are required to respond to legal issues, ODF may take steps necessary to protect the interests of the State, including contract alteration, suspension, or termination.

Prospective purchasers are encouraged to contact the Tillamook ODF District at (503) 842-2545 for further information or questions relative to threatened or endangered species surveys, future planned survey information, or other threatened or endangered species information.

ODF will modify timber sale contracts to allow purchasers who harvest after HCP permit issuance (expected in 2022) to harvest either (1) under requirements pre HCP to avoid take of listed species or (2) under the new requirements of the HCP, as applicable to each timber sale. If a purchaser chooses to harvest consistent with the requirements of the HCP, it will be the responsibility of the purchaser to comply with the HCP and permits, with assistance from and approval by ODF.

SPECIAL REMARKS:

**NO PERSONAL OR COMPANY CHECKS ACCEPTED FOR THE BID DEPOSIT.  
SEASONAL RESTRICTIONS APPLY - SECTION 2455.**

Felling Operations shall not be allowed in Unit 3, other than that necessary for the completion of Project Work, prior to October 1, 2022 (Sections 2310, 2455).

Log hauling from November 1 through March 31 shall be subject to loads per day limitations as determined by STATE (Section 2035).

Pulp removal is required unless otherwise approved in writing by STATE.

Sale acreage was determined using GIS.

"Log Accountability" (Section 2015), "Log Measurement" (Section 2020), "Log Branding and Painting" (Section 2030), and Exhibit 'C' contain special language for pulp removal.

Directional felling shall be used near OHV trails in ground-based portions of Unit 3 (Section 2310).

Ground-based equipment shall not be operated on trails and skidding logs across trails only at pre-approved locations (Section 2425).

The information shown on the Exhibit A map(s) are approximate locations. Exact locations of features represented by map symbols shall be determined on site and shall depend upon the conditions that exist on site. Activities shall be conducted based upon features determined on site rather than features shown on maps.

### Habitat Suitability

This sale contains potentially suitable habitat for northern spotted owls in all units. This sale does not contain potentially suitable habitat for marbled murrelets.

### Survey Results

This sale was covered by ongoing northern spotted owl density surveys in 2020 and 2021<sup>1,2,3</sup>. Northern spotted owls have not been observed within 1.5 miles of any sale units during these surveys. In 2020 there was one unknown Strix observation within 1.5 miles of Unit 1. Density surveys will be ongoing during the life of the sale contract.

Marbled murrelet surveys are not required for this sale.

### Known T&E Resources

There are no Marbled Murrelet Management Areas or spotted owl activity centers affecting this sale.

<sup>1</sup> Oregon Department of Forestry, November 1, 2017. 1.2, Northern Spotted Owl Policy

<sup>2</sup> USDI Fish and Wildlife Service. 2012. Protocol for surveying proposed management activities that may impact northern spotted owls. 42pp.

<sup>3</sup> Forsman, E. D. 1995. Spotted Owl Monitoring Protocols for Demographic Studies. U.S. Department of Agriculture. Pacific Northwest Research Station. Corvallis, OR. 11 pp

## **Operational Considerations**

Due to the presence of barred owls, felling restrictions for spotted owl spot check surveys are not required for this sale at this time.

Northern spotted owl survey results will not expire unless density surveys are discontinued. If density surveys are discontinued at any point during the contract, survey coverage will be valid until March 15, three years following the last full season of surveys.

## **Future Survey Plans**

This sale will be covered by northern spotted owl density surveys during the life of the contract. These density surveys provide incidental survey coverage in lieu of spot checks. If density surveys are not conducted, then spot checks will be required.

ODF has an active northern spotted owl survey program and surveys for other planned operations and density surveys will be conducted within 3 miles of this sale during the life of the contract.
