### Habitat Suitability

This ice storm damage salvage sale contains potentially suitable habitat for northern spotted owls. This sale does not contain potentially suitable habitat for marbled murrelets.

### Survey Results

This sale was covered incidentally by northern spotted owl operational surveys in 2023 and 2024, using a protocol endorsed by the U.S. Fish and Wildlife Service<sup>1,2</sup>. Northern spotted owls were not observed within 1.5 miles of this sale during these surveys.

Surveys for marbled murrelets are not required for this sale and there are no Marbled Murrelet Management Areas (MMMA) affecting this sale.

### Known T&E Resources

This sale is not within 1.5 miles of a northern spotted owl activity center. Since this sale falls within two, non-baseline thieessens as identified in the Safe Harbor Agreement (SHA) with the U.S. Fish & Wildlife Service (USFWS), a Biological Assessment of the sale's potential impact is not required by ODF policy.

This sale is not within 100 meters of potential murrelet habitat and there are no Marbled Murrelet Management Areas (MMMA) affecting this sale.

## **Operational Considerations**

Due to the presence of barred owls, felling restrictions for spotted owl spot check surveys are not required for this sale at this time.

Northern spotted owl surveys are valid until March 15, 2027.

## **Future Survey Plans**

ODF has an active survey program. Surveys for other planned operations, northern spotted owl operational surveys, spot check surveys and activity center monitoring may be conducted within 3 miles of this sale during the life of the contract.
