In the event any T&E species is found within or in the vicinity of the Area(s) of Operations, or the State otherwise deems it necessary or expedient to take action in response to any pending or threatened legal action concerning State forest land or any T&E species, PURCHASER agrees that STATE may take steps to protect the interests of the State, including imposing restrictions on PURCHASER's Operations under the Contract to prevent disturbance to T&E species, including Contract modification, suspension, or termination.

PURCHASER also acknowledges that at some point during the Contract term, the STATE may also become subject to terms and conditions of Incidental Take Permits issued by the federal government covering State forest lands. PURCHASER agrees that any Operations that occur following issuance of an Incidental Take Permit, if any, must be carried out consistent with such terms and conditions that include required minimization and mitigation measures proposed in the applicable Habitat Conservation Plan, and PURCHASER further agrees that STATE may take steps to protect the interest of the State, including imposing restrictions on PURCHASER's Operations under the Contract to ensure such compliance, including Contract modification, suspension, or termination.

Habitat Suitability

This sale contains potentially suitable habitat for northern spotted owls.

Survey Results

This sale was covered by northern spotted owl operational surveys in 2023 and 2024, using a protocol endorsed by the U.S. Fish and Wildlife Service^{1,2}. No northern spotted owls were observed within 1.3 miles of this sale during these surveys. Surveys are ongoing in 2025 with no spotted owl observations to date. There is ongoing bioacoustic sampling in the vicinity being conducted by the Oregon Department of Forestry and potentially other land managers in the area.

Known T&E Resources

This sale is within 1.3 miles of a spotted owl activity center, and a Biological Assessment of the sale's potential impact is required by ODF policy. A Biological Assessment of the sale's impact on the activity center has been completed. It concludes that the Wind Chime timber sale, as currently planned, poses a low risk of negatively affecting the occupancy or productivity of the northern spotted owl site.

² Oregon Department of Forestry, November 1, 2017. 1.2, Northern Spotted Owl Policy

Operational Considerations

There are no operational considerations for protecting T&E resources associated with sale.

Northern spotted owl surveys will be valid until March 15, 2028, upon completion of surveys in 2025.

All timber should be felled by March 15, 2028.

Future Survey Plans

ODF has an active survey program. Surveys for other planned operations, northern spotted owl operational surveys, spot check surveys, and activity center monitoring may be conducted within 3 miles of this sale during the life of the contract.
