Habitat Suitability

This sale contains potentially suitable habitat for northern spotted owls. There is potentially suitable habitat for marbled murrelets within or adjacent to Units 1, 2, and 3.

Survey Results

This sale has been covered by density surveys in 2022 and 2023^{1,2,3}. These density surveys are ongoing and are planned to be conducted during the life of this contract. Northern spotted owls have not been observed within 1.5 miles of this sale during these surveys.

This sale was surveyed for marbled murrelets in 2022 and 2023. These surveys were conducted using a protocol developed by the Pacific Seabird Group⁴. Marbled

murrelets were detected as present on nine occasions during these surveys. However, behaviors indicating occupancy were not observed.

Known T&E Resources

There are no northern spotted owl activity centers or Marbled Murrelet Management Areas affecting this sale.

Operational Considerations

This sale is in a density survey coverage area. Northern spotted owl felling deadlines for survey expirations will not be in effect unless density surveys are discontinued. If density surveys are discontinued at any point during the contract, survey coverage will be valid until March 15, three years following the last full season of surveys.

Marbled murrelet surveys are valid until April 1, 2029.

All timber should be felled by April 1, 2029.

Future Survey Plans

This sale will be covered by northern spotted owl density surveys during the life of the contract. These density surveys provide incidental survey coverage in lieu of spot checks. If density surveys are not conducted, then spot checks will be required. In addition, ODF has an active survey program and surveys for other planned operations and northern spotted owl density surveys will be conducted within 3 miles of this sale during the life of the contract.
